EMPLOYMENT RECORD:

1. Associate | Cognizant Kolkata, IND | Aug 27, 2021 – Present

-
- Participated in meetings with clients to discuss project objectives and timelines.
 - Reviewed user stories, designs and requirements documents for accuracy of information.
 - Prioritized and organized tasks to efficiently accomplish service goals.
 - Wrote and updated manual test cases for team use, maintaining optimal organization for maximum productivity.
 - Worked successfully with a diverse group of coworkers to accomplish goals and address issues related to our products and services.
 - Coordinated with multiple project teams to ensure successful integration of changes into production systems.
 - Worked with Agile and Scrum methodologies to accomplish project milestones and meet demanding timelines.
 - Created and maintained a database of common and known testing defects.
 - Completed unit and regression tests on software and individual modules.
 - Monitored and facilitated bug resolutions to optimize software.
 - Maintained traceability matrix of all test cases to ensure coverage of all project requirements.
 - Created and optimized automated testing tools for repetitive tasks.
 - Conducted system, integration, regression, smoke, and functional testing to ensure all the requirements are met.
 - Identified software defects and reported them in bug tracking systems.
 - Met project scope and delivery dates by planning optimal testing schedules.
 - Completed day-to-day duties accurately and efficiently.
 - Prepared DSR and WSR on a daily and weekly basis.

2. Intern | Cognizant

Kolkata, IND | Dec 2020 – May 2021

- Trained in automation testing with Java Selenium for around 6 months starting from scratch.
- Created an automation project as a part of the final project for the internship on a website (<https://www.practo.com/>) whose essential automation scope was to handle the following:
 - Handling alerts, multi-browser windows, and search options.
 - Navigating back to the home page.
 - Extract multiple options items & store them in collections.
 - Filling forms (in different objects on the web page).
 - Capture a warning message.
 - Create a report on the automation.
